

What countries does PayPal support

PayPal is a true international payment solution. Check out their [supported countries](#).

How do I register for PayPal?

Simply [create a PayPal account](#).

What Paypal settings should I choose?

Please choose a **Business** account and **Payments Standard** as your payment solution.

Do I need to get verified?

Absolutely. Please ensure you complete all the verification steps you can. This lifts all the limits on your PayPal account, including the acceptance of multiple currencies.

How do I setup my PayPal account in editor.wix.com?

1. Go to your *Product Gallery page*
2. Click within the products display
3. Click on *Manage Store*
4. Click on *Payment & Currenc*
5. Under *Methods*, make sure *PayPal* is selected
6. Enter your *PayPal email address*.
7. Click *Save*
8. Under *Currency* select the currency
9. Click *Save*
10. Under *Weight* select *Pounds or Kilograms*
11. Click *Save*
12. Click *Back to the Editor*
13. Save and Publish as normal to activate this function on your web site

That's it, you can now accept online payments through PayPal.

How much are the PayPal fees (examples below)?

- [Australia](#)
- [Canada](#)
- [Ireland](#)
- [New Zealand](#)
- [UK](#)
- [USA](#)

If your country isn't listed above, just Google 'paypal fees' for your country.

How do I get money out of PayPal?

Easy, just [withdraw your money](#)

Do customers need a PayPal account to pay with a credit card?

No, once they arrive at PayPal, there's an option to pay with a credit card only and bypass creating a PayPal account.

Why don't my customers see the 'pay with credit card' option on PayPal?

If you don't see this option, please consider the following:

- Your PayPal account must be either Premier or Business. Personal Accounts do not have this option.
- The PayPal account optional setting is turned on - this enables non-PayPal members to pay by credit card.
- The PayPal email address you're using must be verified. Please complete all the verification steps PayPal requests.
- In PayPal, your Bank Account is linked and verified - so you can withdraw or transfer funds.
- In PayPal, your Credit Card linked and verified.

To enable the PayPal account optional feature:

- Go to your Account Profile.
- Select: My Selling Tools
- Under: Selling Online
- Locate: Website Preferences
- Click on: Update
- Locate: PayPal Account Optional
- Click: On
- Click: Save

When the "account optional" feature is turned on, customers don't need a PayPal account. They use an alternate checkout and have the option to sign up for a PayPal account afterward. Customers with PayPal accounts still log in to their PayPal accounts to check out.

Next, there are specific reasons the credit card option may not be available to your customers.

- You are using the wrong email address or an unverified email address.
- The country you reside in. Not all countries have all the PayPal features available.
- The country your customers reside in. Not all countries have all PayPal features available.

When testing your web site and PayPal functionality, it is advised to delete the Cookies in your browser. If you do not do this, when you Check Out, you will see a PayPal page based on PayPal assuming it is you making a purchase and which shows the PayPal Login as the main part and an option below that stating "Pay with my credit or debit card (Optional) Sign up for PayPal for faster future checkout". If you do select this bottom option, PayPal will take you to the page the buyer normally sees. If you do not clear the Cookies it is still okay but the first page to appear on Check out can lead to thinking credit card payments without logging in to PayPal might not be working. If you do clear Cookies, you will see a PayPal page on Check out (which your buyer will normally see unless they are a PayPal registered member with their ID in their Cookies) which shows a small box "Pay with my PayPal account" and under this a large box headed "Pay with my credit or debit card" and containing all the typical data entry boxes for an online credit or debit card purchase.
